

Academics

Overview

From PK3 to 8th grade, Transfiguration School provides a nurturing environment that challenges students academically while allowing them to mature into socially responsible learners. We strive to impart our young scholars with an education grounded in our Catholic roots that instills meaningful lessons and values that families of all faiths can appreciate.

What Sets Us Apart

Transfiguration School distinguishes itself with an academic program that evolves with the needs of its students. Our lead educators are constantly examining the effectiveness and content of our curricula allowing teachers to reach every student. This program is supported by our dedicated and patient faculty committed to improving student learning every day. Beyond academics, our educators are committed to ensuring our students leave here with an advanced social awareness and level of maturity that prepares them for the next step in their academic careers.

Benefiting Our Parents

Parent collaboration is a critical component to any child’s education. We ensure that our administration and faculty are knowledgeable about every student that is taught at Transfiguration School. Such inclusiveness allows our teachers to speak to parents directly and descriptively about their children, giving us the ability to provide each student with a personalized plan for their success.

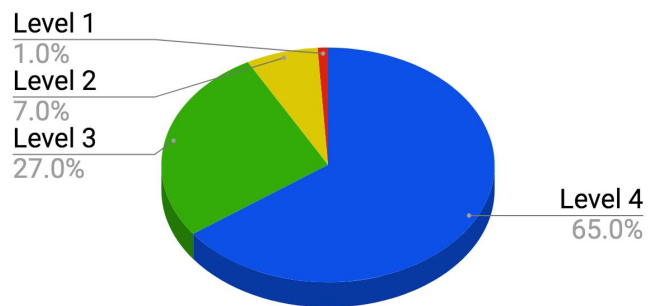

NYS Testing

Students work to achieve proficiency in the NYS Math and ELA standards. Each year this proficiency is measured through the NYS exams for grades 3 - 8. In both ELA and Math, students' raw scores on the exam are converted to proficiency levels outlined below:

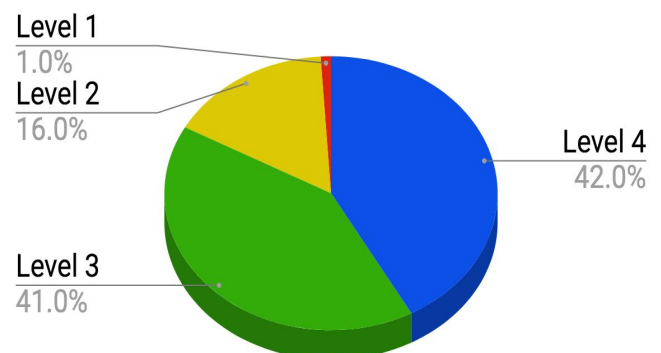

- Level 4 – Exceeds proficiency standard
- Level 3 – Meets proficiency standard
- Level 2 – Does not meet proficiency standard
- Level 1 – Does not meet basic standard

Transfiguration school is proud to acknowledge that in 2018 more than 80% of its students demonstrated proficiency in both ELA and Math. Students that did not reach this benchmark are given personalized and focused attention to ensure their performance improves.

How Transfiguration School Measures Up

In 2011, Transfiguration School was awarded status as a Blue Ribbon School, an honorable and coveted recognition that reinforces the academic rigor of our curricula and continued success of our students. Not only do our students excel at all grade levels, academic success at Transfiguration School is held in high esteem; as a Blue Ribbon School, our students are held to some of the highest standards in New York City. As a result of these high standards paired with hard-working and dedicated educators, our students vastly outperform New York City expectations across the board.
